Summary

Electrical Design Engineer with 2+ years of experience at Schneider Electric delivering industrial-grade electrical systems across power electronics, automation, and order engineering. Skilled in end-to-end schematic design, BOM management, and cross-functional project execution using a professional CAD and ERP toolset. Seeking to apply hardware design and systems engineering expertise.

Technical Skills

Design & Engineering: Electrical Schematics, Panel Layout Design, Control Panel Design, Power Factor Correction (PFC), Low/Medium-Voltage Systems, Switchgear, Rapid Prototyping, Engineering Drawings

Software & Tools: AutoCAD, SEE Electrical Expert (SEE XP), SAP (ERP/BOM), ODM, MACOLA, EPLAN, CREO,

Hardware & Systems: Automated Testing Machines, MCB/MN/MX Coil Testing, 11kV Circuit Breakers, NexGen Panels, Transformer Combos, Machine Automation & Control Circuitry

Standards & Processes: International Electrical Standards Compliance, BOM Management, Quality Assurance, Cross-functional Coordination

Experience

Schneider Electric Bengaluru, India
Electrical Design Engineer *September 2024 – Present*

- Engineered electrical schematics and panel layouts for industrial **Power Factor Correction (PFC)** systems using AutoCAD; managed end-to-end **BOM generation via SAP** to ensure procurement accuracy and production alignment.
- Led schematic drafting for **Automated Testing Machines** (MCB, MN & MX coil units) using SEE Electrical Expert, ensuring full compliance with international electrical standards across 10+ machine designs.
- Delivered end-to-end design support for **machine automation and control circuitry** across multiple concurrent projects, directly supporting product validation and manufacturing reliability.
- Executed order engineering for **MPS, Transformer Combos & NexGen panels** using AutoCAD, SAP, ODM & MACOLA; developed deep expertise in LV/MV custom equipment configuration and client-specific technical requirements.
- Demonstrated cross-team versatility by contributing across three specialized groups — **SEPFC (Order Engineering), MDC (Machine Design), and Salisbury (Order Engineering)** .

The Mysore Electrical Industries Limited Bengaluru, India
Electrical Engineer *September 2023 – October 2023*

- Gained hands-on experience in manufacturing, assembly, and testing of **11kV Circuit Breakers** for fault protection against short circuits, ground faults, and phase faults.
- Supported rigorous quality and testing protocols ensuring equipment compliance with safety standards; contributed to pre-manufacturing technical evaluation and cross-functional production planning.

Solar Electrical Vehicle Design Project Bengaluru, India
Electrical Engineer *March 2022 – April 2022*

- Completed research internship on solar EV design, gaining foundational knowledge in **power electronics, energy harvesting, and electrical-mechanical integration** for sustainable mobility systems.

Key Achievements

- Rotated across **3 specialized engineering teams** at Schneider Electric (Machine Design, Order Engineering), demonstrating rapid adaptability and broad domain ownership.
- Independently operated a **5-tool engineering software stack** (AutoCAD, SEE XP, SAP, ODM, MACOLA) across simultaneous live projects in a global industrial setting.
- Designed automated test infrastructure validating **critical circuit breaker components** at manufacturing scale, directly contributing to Schneider Electric's product quality benchmarks.

Education

Oxford College of Engineering Bengaluru, India
Bachelor of Engineering – Electrical & Electronics Engineering (EEE) *January 2020 – April 2024*
